Professional Summary

Backend Engineer with 6+ years of experience building scalable APIs and systems. Strong in Python (FastAPI, Django, Flask) and Golang (Gin) for high-performance needs. Experienced in e-commerce, promo engines, and payment integration systems. I focus on turning complex logic into clean, reliable, and maintainable code. Open to remote/hybrid roles, always ready for the next challenge.

Technical SkillsWork

Languages:	Python, Golang, JavaScript
Backend:	Django, FastAPI, Flask, Gin, RESTful APIs, Microservices
Databases & Caching:	PostgreSQL, MongoDB, Redis, Elasticsearch, Kafka
Frontend & UI:	Vue.js, Next.JS, Bootstrap, HTML5, CSS3
Tools & Infra:	RabbitMQ, Cronjob, Jira, Bitbucket, Git

Experience

Fullstack Developer — Hyperscal, Jakarta **11/2025 – 10/2026**
Tech: Golang (Gin), Next JS, RESTful APIs, Document Parsing

- Parsing payment services for payment processing systems.
- Built document parsing pipelines to extract and transform invoice data from multiple formats into structured database records.
- Migrated and refactored RESTful APIs from Django (Python) to Go (Gin), improving performance and scalability.
- Re-architected legacy APIs from Java to Go (Gin) to streamline system efficiency and reduce latency.
- Develop CRM modul revenue management

Backend Developer — Gramedia Digital, Jakarta **03/2022 – 08/2025**
Tech: RESTful APIs, Midtrans, Xendit, B2B/B2C Integrations

- Developed and optimized APIs to support B2B & B2C operations.
- Integrated payment gateways (Midtrans, Xendit).
- Built Mitra Dashboard and automated marketplace airwaybill systems.
- Enhanced wholesale and promotion features for better partner engagement.
- Added promo product features to support marketing campaigns.
- Integrated the new tier membership system.

Fullstack Developer — PT. Dipantara Inovasi Teknologi, Jakarta **12/2019 – 08/2022**
Tech: Python (Django, Flask), PostgreSQL, Bootstrap, Neo4j, Elasticsearch, Cronjob

- Built scraping tools for YouTube & TikTok using Flask.
- Implemented task scheduling with Cronjob.
- Developed applications with Django, Bootstrap, PostgreSQL.
- Integrated Flask with Neo4j, Elasticsearch, and Evello API.

Fullstack Developer — SOSARO, Jakarta **06/2019 – 10/2019**
Tech: Python (Django, Flask), PostgreSQL, REST APIs

- Created project management apps with Flask & PostgreSQL.
- Built REST APIs with Django for mobile integration.

Fullstack Developer — CoderDojo, Yogyakarta **04/2018 – 04/2019**
Tech: Python (Django), Vue.js, Jira, Bitbucket

- Developed fullstack web apps using Django & Vue.js.
- Improved frontend & backend features.
- Managed sprints in Jira & version control with Bitbucket.
